

CROMWELL PCL. BG8001 SAFETY BLOWGUN ERGO STANDARD NOZZLE

Cod comanda: **PCL2598001A**

Descriere produs:

This range of well built ergo blowguns are made from durable zytel nylon and feel comfortable in the hand. They feature an air release valve which enables the trigger/air flow to be feathered. The blowguns also have automatic pressure reduction, ensuring the air inlet will automatically be reduced to the recommended 2 bar. In turn, user error is essentially eliminated and the user is kept safe. The extreme models also feature a flexible rubber grip on the handle for additional cushioning. Features and Benefits o Reinforced webbing for extra strength o Easy storage with multiple hanging points o Air release valve built into the body enables the trigger/airflow to be feathered o Extended models have a nozzle which can be adjusted to suit individual applications Typical Applications o Clearing equipment and surfaces of debris o Laboratories o Manufacturing o Workshops o Body shops
