

CROMWELL Sherwood. 11.50mm Diameter HSS Straight Shank Roll Forged Jobber Drill

Cod comanda: **SHR0256544Q**

Descriere produs:

The HSS Roll Forged Jobber Drills are versatile tools ideal for precise drilling in wood, plastic, carbon, and plain steels, where advanced flute cutting is unnecessary. Manufactured from high-speed steel (HSS) with a roll-forged grain structure, they ensure exceptional strength, rigidity, and durability. The ground tips deliver efficient cutting performance, while the black oxide finish enhances resistance to wear and corrosion. Designed with a 118° point angle, these drills provide reliable and accurate results. Suitable for a variety of applications, they are a dependable choice for professionals and DIY users seeking quality and versatility in their drilling tasks.

Features and Benefits

- Constructed from HSS for enhanced durability and stability
- Roll-forged manufacturing provides an even and robust grain structure
- Precision-ground tips deliver smooth and accurate cuts
- Coated with black oxide to resist wear and reduce corrosion
- Includes a 118° point angle for precise and consistent results
- Ideal for drilling tasks on wood, plastics, carbon, and plain steels

Standards: DIN 338 Type N
