

CROMWELL Sherwood. 2.00mm Diameter HSS Straight Shank Roll Forged Jobber Drill

Cod comanda: **SHR0256543G**

Descriere produs:

The HSS Roll Forged Jobber Drills are versatile tools ideal for precise drilling in wood, plastic, carbon, and plain steels, where advanced flute cutting is unnecessary. Manufactured from high-speed steel (HSS) with a roll-forged grain structure, they ensure exceptional strength, rigidity, and durability. The ground tips deliver efficient cutting performance, while the black oxide finish enhances resistance to wear and corrosion.

Designed with a 118° point angle, these drills provide reliable and accurate results. Suitable for a variety of applications, they are a dependable choice for professionals and DIY users seeking quality and versatility in their drilling tasks. Features and Benefits o Constructed from HSS for enhanced durability and stability o Roll-forged manufacturing provides an even and robust grain structure o Precision-ground tips deliver smooth and accurate cuts o Coated with black oxide to resist wear and reduce corrosion o Includes a 118° point angle for precise and consistent results o Ideal for drilling tasks on wood, plastics, carbon, and plain steels Standards o DIN 338 Type N
