

CROMWELL SwissTech. 8.0MM 4 FLUTE 0.50 RADIUS VARIABLE HELIX TiAlN COATED CARBIDE END MILL

Cod comanda: **SWT1641022H**

Descriere produs:

This range of 4 flute variable helix end mills are manufactured from carbide and have a 0.5mm corner radius. Finished with a TiAlN coating, the end mills are available in a range of sizes and are suited for machining steels, stainless steels and high temp alloys for versatility. Features and Benefits o Ideal for customers machining a wide range of materials o Designed for machining Steel/Stainless and High Temp Alloys for versatility of use o 35/38° variable helix for reduced vibration for improved accuracy of machining o TiAlN coating allows for increased tool life and resilience Typical Applications o Ideal for machining steels, stainless steels and high temp alloys
